GRAY'S NEW PATENTED Cotton and Hay Press

THE latest, and by tar the cheapest and most perfect Cotton Screw ever invented. One mule, with the greatest ease, can pack a bale of 750 pounds. The Screw is made of Iron, the levers do not rise and fall. The advantages of this patent over all others are as fol-

1st.—Anti-friction Revolving Nut, with Friction balls, by which the friction is taken entirely from the screw. 2d .- The levers are bolted directly to the nut, and thus direct power is obtained on the

nut, and the screw is relieved from the twisting strain upon all screws now in use. 3d .- The screw being fixed permanently to the follower block, is relieved from friction. to which all revolving screws are subjected. 4th.-The frame to which this screw is at tached, is put together with morticed dovetails and keys, making it strictly portable. It can be put up, ready for use, in one hour.

5th.-Increased power, without the loss of motion and many other advantages, which can be explained by an examination of the beautiful model now on exhibition at F. WEST & Co.'s, No. 78 Dauphin street, Mabile, Ala., who are the sole agents of this Press for the city of Mobile and the country at large. The Iron Work is being daily east by the Mobile Foundry, as cheap and smooth as it could be done north of Mason and Dixon's Messrs. F. WEST & CO. are prepared to re-

ceive and supply orders at once to the satisfaction of all demands. Come and see for yourselves. Price not over \$100. F. WEST & CO., Mobile, Ala.,

trashed, and the complement of machinery we have arrranged, will effect this. This we have gotton up because of t spread destruction of Gin Houses, and the nacessity of a portable set of Ginning and Pressing Mchinery. Steam Power, 4 to 8-horse, can be substi-

tuted for the horse power mentioned above, at an additional cost. AGRICULTURAL MACHINERY:
